Following up from my note on Friday, Colonial Pipeline operations are "normal" into Greensboro this morning so that's very good news. Additionally, our folks appear to have avoided significant impacts to

refineries and other critical infrastructure in the Gulf over the weekend. I'll let you know if any of that changes but I am encouraged by the initial reports this morning.

Please let me know if you need anything.

Take care!

David

Subject: NC Petroleum Council Update re: Nate

Gentlemen,

I'm just touching base to let you know that we are obviously very closely monitoring potential impacts from Nate (especially in SE Louisiana where a large number of refineries are located) and right now do not anticipate any significant disruptions in fuel supply as a result. Although we are still not back to pre-Harvey levels of refining capacity or storage, the macro situation has improved significantly over the last two-three weeks.

Colonial is also monitoring closely and preparing to deploy emergency generators at compressor stations along the pipeline route should that become necessary.

I'll certainly keep you posted from this end as the situation develops but in the interim, please don't hesitate to call with any questions or concerns.

Thank you and have a great weekend,
David
